

VeriSign® Enterprise Wireless and Mobility for Healthcare

KEY BENEFITS

- **Automate** time-consuming manual tasks and paperwork
- **Reduce** billing and pharmacy callbacks with real-time coding
- **Increase** safety of prescriptions written for patients
- **Ensure** HIPAA compliance for patient confidentiality
- **Track** the location of clinical assets, patients, and staff
- **Access** patient and reference information at the point of care

VeriSign enables and protects more than 30-billion global interactions every day and offers extensive wireless communication solutions so the world can communicate, conduct commerce, and access the latest content—anywhere, any time, across any network and with any device.

VeriSign® Enterprise Wireless and Mobility for Healthcare solutions save time for physicians and clinical staff, enhance patient safety, protect patient confidentiality, and lower technology costs.

+ The Issue

Healthcare providers have to do more with less every day. Demographically-driven increases in patient loads are as much a fact of life as the industry-wide shortage of nursing staff. New patient confidentiality requirements, such as Health Insurance Portability and Accountability Act (HIPAA), have added extra time and record keeping to clinical workflows. Adverse events are on the rise, increasing provider liability and producing even more time-consuming patient safety protocols. With costs spiraling higher and pressure mounting, modern-day healthcare providers are deploying wireless clinical applications that integrate with existing IT investments to improve efficiency and safety.

+ The Solution

Our suite of wireless clinical applications is a growing portfolio of easy-to-integrate software that supports clinical workflow across multiple hospitals in both inpatient and outpatient settings.

VeriSign Enterprise Wireless and Mobility for Healthcare includes access to clinical information and lab results, a charge-capture solution that can verify proper coding on the spot, electronic prescribing with direct pharmacy routing to reduce callbacks and formulary compliance, mobile medical libraries containing treatment guidelines and pharmaceuticals, and portable dictation capabilities.

In addition, we provide wireless asset tracking systems for clinical assets such as diagnostic instruments. These systems can be extended to patients and staff to improve workflow efficiency.

SOLUTION BRIEF

+ Bundled Services

VeriSign provides bundled services, allowing for a turnkey solution, so you can focus on your business rather than on implementation, deployment, and training. VeriSign manages everything from initial requirements mapping and Enterprise Resource Planning (ERP) integration to software configuration and handheld deployment.

+ The VeriSign Advantage

Our VeriSign® Global Consulting Services organization enables companies to scope, define, and implement digital infrastructure solutions that help drive new revenue streams quickly and improve customer loyalty. With expertise in media and entertainment, wireless and mobility, supply chain, and security, our consulting services offer an unmatched combination of vision, technology, and intelligence—combined with an unparalleled ability to execute.

The experienced professionals of VeriSign Global Consulting Services leverage mobile technology expertise and industry experience to offer complete end-to-end solutions: strategy, business case analysis, hardware and software requirements, system integration, workforce training, and support. We help clients stay ahead of the market with high quality, comprehensive solutions to complex business and technology problems.
