Protect And Grow Your Business With A Web Site Security And Authentication Solution From VeriSign

Consumer concerns over Internet security are increasing, making it harder for small online businesses to grow revenues. Studies show that between 25% and 60% of consumers who begin an online purchase transaction don't complete it—and the top reason is because they don't trust the security and privacy policies of the Web site. That's where VeriSign can help. Our Secure Site Service gives you everything you need to protect and grow your business.

Here's what you get:

- The VeriSign® Secure Site Seal
- SSL (Secure Sockets Layer) encryption services
- Premium business authentication services
- NetSure® Warranty Protection

Protect your business with VeriSign's innovative, best-in-class Secure Site Service.

VeriSign's Secure Site Service is an industry first, providing small and medium-sized businesses with professional-grade protection encryption features that until now have only been available to enterprise companies with dedicated hosting facilities. It's the only authentication and encryption solution that conforms to WebTrust and AICPA emerging standards for SSL security in a shared hosting environment.

Grow your business with the most trusted seal on the Internet.

Our Secure Site Service comes standard with the VeriSign Seal. Displaying the Seal on your Web site lets your customers know your site is safe to do business with. Independent research shows that the VeriSign® Secure Site Seal is the only seal proven to reduce shopping cart abandonment

dramatically, resulting in increased sales of as much as 15% or more. With over 1 million clicks on the seal every month, the VeriSign® Secure Site Seal is a market-tested and market-proven way to give your customers peace of mind.

From the leader in on-line security.
