

KEY BENEFITS:

Service Differentiator - A new service offering to grow and maintain valuable call center and telemarketing business

Cost-efficient Solution for DNC

Compliance - Managed service requires no capital investment (AIN-enable switch for the carrier - existing trunks for telemarketer), and relieves the cost of ongoing administration

Simple and Comprehensive - Streamlines Telemarketers' operation with access to National, State, Wireless, and In-house DNC lists with multiple reports available via a simple web GUI

Customer Support - We will assist in full training of your sales staff and offer incentive pricing to attract your highest-volume customers

Customer Confidence - TeleBlock is a recognized and respected name among telemarketers and telemarketing associations

TeleBlock® Do-Not-Call

TeleBlock Do-Not-Call (DNC) service from VeriSign provides your telemarketing call center clients with a simple and efficient DNC method for managing outgoing telemarketing calls, while adding value and enhancing your landline voice offerings. Using the award-winning TeleBlock process, this comprehensive DNC service meets the growing demands and mandates for call block services by automatically screening and blocking outbound calls to national, state, ported wireless, and in-house DNC lists. TeleBlock manages call blocks centrally, allowing for multiple offices and outsourced call centers to efficiently administer DNC lists. Backed by the trusted services of VeriSign and the innovation of Call Compliance technology, TeleBlock DNC provides you and your clients easy implementation, dependable service, and new revenue opportunities.

+ Simplifying Compliancy

Offer your call center and telemarketing clients an effective service that assists in compliance with DNC regulations and requests. The traditional method of "scrubbing" call center prospect lists against multiple DNC lists is time-consuming, labor-intensive, and prone to error. It is further complicated by the requirement for monthly updating of the National DNC list. VeriSign's TeleBlock DNC service centralizes DNC data by consolidating multiple lists into a single proprietary list, streamlining and simplifying list management. Using a Web-based interface customized for your brand, your clients can search and maintain DNC data with simple administration tools. TeleBlock DNC helps your clients reduce capital expenses and avoid the complaints, fines, and penalties that can damage their reputation-and their bottom line.

+ Flexible, Universal Operation

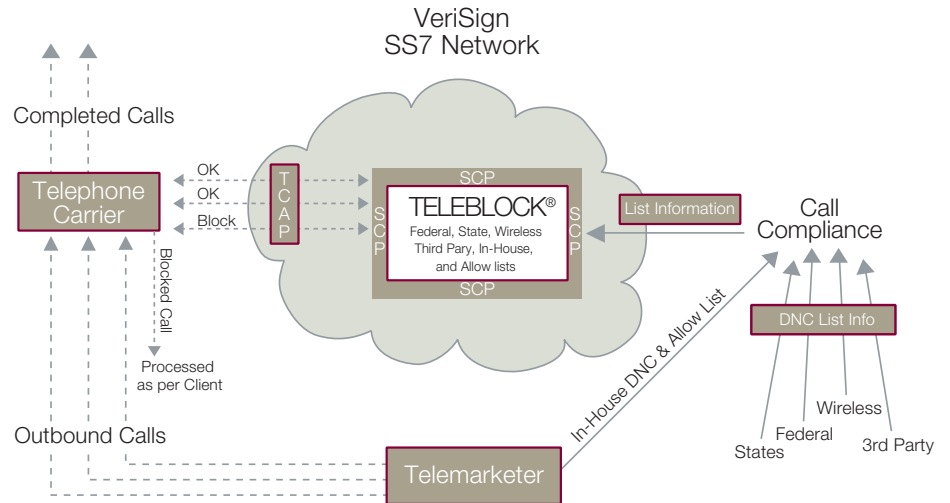

TeleBlock DNC operates independently of your clients' telephone equipment and is compatible with all current equipment choices. The service is designed to work for all of your call center clients, regardless of the size of their operations. This flexibility allows them to efficiently scale their operations up or down. TeleBlock DNC supports multiple locations nationwide, including satellite offices and outsourced call centers. The system is available, and accessible to all domestic service providers.

About Call Compliance

Call Compliance, Inc., a privately held company located in Glen Cove, NY, is the leader in the development of innovative technological solutions in the compliance sector. The company offers a complete array of compliance-oriented services including its patented TeleBlock® Call Blocking System. For more information, visit www.callcompliance.com.

+ TeleBlock DNC In Action

A telemarketer who has uploaded the appropriate DNC list(s) to TeleBlock DNC and who dials a number appearing on that company's centralized DNC list will hear a recorded "blocked number" message. TeleBlock DNC includes options for standard and customized Special Information Tones (SIT) for the identifiable disposition of blocked calls in a predictive dialer environment and telemarketer-specific customized messages. Your clients will also have the ability to transfer a blocked caller to an Interactive Voice Response (IVR) system or other designated department in the telemarketing organization.

+ TeleBlock DNC Features

- User-friendly, Web-based, customized interface for easy administration and enhanced compliance
- Deployed on VeriSign's highly-scalable and redundant ATLAS platform for maximum efficiency and reliability
- Compatible with all single and multiple line telephones, key systems, PBXs, predictive dialers, and other computer generated dialing equipment
- Standard and customized "blocked number" messages available
- Ability to transfer blocked callers to IVR system or another department
- Centralized, consolidated access to available DNC lists
- Administration pages can be customized to reflect the branding of the carrier's name, logo, contact information, etc.
