As of March 31, 2019, the largest TLDs by number of reported domain names were .com, .cn, .tk, .de, .net, .uk, .org, .tw, .nl, and .ru.\textsuperscript{1}
LARGEST ccTLDs BY NUMBER OF REPORTED DOMAIN NAMES

Source: Zooknic, Q1 2019
For further information on the Domain Name Industry Brief methodology, please refer to the last page of this brief.

Total ccTLD domain name registrations were 156.8 million at the end of the first quarter of 2019, an increase of 2.5 million domain name registrations, or 1.6 percent, compared to the fourth quarter of 2018.1,2 ccTLDs increased by 10.5 million domain name registrations, or 7.2 percent, year over year.1,2 Without including .tk, ccTLD domain name registrations increased 1.4 million in the first quarter of 2019, or 1.1 percent, compared to the fourth quarter of 2018. ccTLDs, excluding .tk, increased by 7.8 million domain name registrations, or 6.2 percent, year over year.

The top 10 ccTLDs, as of March 31, 2019, were .cn (China), .tk (Tokelau), .de (Germany), .uk (United Kingdom), .tw (Taiwan), .nl (Netherlands), .ru (Russian Federation), .br (Brazil), .eu (European Union), and .fr (France).1,2 As of March 31, 2019, there were 304 global ccTLD extensions delegated in the root zone, including Internationalized Domain Names (IDNs), with the top 10 ccTLDs composing 65.2 percent of all ccTLD domain name registrations.1,2

TOP 10 TRENDING KEYWORDS IN .COM AND .NET IN Q1 2019

This chart represents the top 10 trending keywords registered in English in .com and .net domain name registrations for the first quarter of 2019.

Verisign publishes a monthly blog post highlighting domain name registration keyword trends that reflects trends from the previous month. Using the same methodology, this list reflects the keywords with the highest percentage of registration growth relative to the preceding quarter.

This method is intended to highlight the new and changing keywords seen in .com and .net domain name registrations. By evaluating the keywords with the largest percentage shift, the top 10 that have seen a significant shift in end-user interest quarter over quarter can be identified.
NEW gTLDs AS PERCENTAGE OF TOTAL TLDs
Source: Centralized Zone Data Service, Q1 2019; Verisign, Q1 2019; and Zooknic, Q1 2019

Total ngTLD domain name registrations were 23.0 million at the end of the first quarter of 2019, a decrease of 0.8 million domain name registrations, or 3.4 percent, compared to the fourth quarter of 2018. ngTLDs increased by 2.8 million domain name registrations, or 13.8 percent, year over year. The top 10 ngTLDs represented 52.9 percent of all ngTLD domain name registrations. The following chart shows ngTLD domain name registrations as a percentage of overall TLD domain name registrations, of which they represent 6.5 percent, as well as the top 10 ngTLDs as a percentage of all ngTLD domain name registrations for the first quarter of 2019.

GEOGRAPHICAL NEW gTLDs AS PERCENTAGE OF TOTAL CORRESPONDING GEOGRAPHICAL TLDs
Source: Centralized Zone Data Service, Q1 2019 and Zooknic, Q1 2019

As of March 31, 2019, there were 47 ngTLDs delegated that meet the following criteria: 1) has a geographical focus and 2) has more than 1,000 domain name registrations since entering general availability (GA). The chart on the left summarizes the domain name registrations as of March 31, 2019, for the listed ccTLDs and the corresponding geographical ngTLDs within the same geographic region. In addition, the chart on the right highlights the top 10 geographical ngTLDs as a percentage of the total geographical TLDs.
ABOUT VERISIGN
Verisign, a global provider of domain name registry services and internet infrastructure, enables internet navigation for many of the world’s most recognized domain names. Verisign enables the security, stability, and resiliency of key internet infrastructure and services, including providing root zone maintainer services, operating two of the 13 global internet root servers, and providing registration services and authoritative resolution for the .com and .net top-level domains, which support the majority of global e-commerce. To learn more about what it means to be Powered by Verisign, please visit Verisign.com.

METHODOLOGY
The data presented in this brief, including quarter-over-quarter and year-over-year metrics, reflects information available to Verisign at the time of this brief and may incorporate changes and adjustments to previously reported periods based on additional information received since the date of such prior reports, so as to more accurately reflect the growth rate of domain name registrations. In addition, the data available for this brief may not include data for all of the 304 ccTLD extensions that are delegated to the root zone, and includes only the data available at the time of the preparation of this brief.

For gTLD and ccTLD data cited with Zooknic as a source, the Zooknic analysis uses a comparison of domain name root zone file changes supplemented with Whois data on a statistical sample of domain names, which lists the registrar responsible for a particular domain name, and the location of the registrant. The data has a margin of error based on the sample size and market size. The ccTLD data is based on analysis of root zone files. For more information, see ZookNIC.com.

1 The figure(s) includes domain names in the .tk ccTLD. .tk is a free ccTLD that provides free domain names to individuals and businesses. Revenue is generated by monetizing expired domain names. Domain names no longer in use by the registrant or expired are taken back by the registry and the residual traffic is sold to advertising networks. As such, there are no deleted .tk domain names. https://www.businesswire.com/news/home/20131216006048/en/Freenom-Closes-5m-Series-Funding#.UxeUGNJDv9s.
2 The generic top-level domain (gTLD) and ccTLD data cited in this brief: (i) includes ccTLD Internationalized Domain Names, (ii) is an estimate as of the time this brief was developed and (iii) is subject to change as more complete data is received.
3 The domain name base is the active zone plus the number of domain names that are registered but not configured for use in the respective Top-Level Domain zone file plus the number of domain names that are in a client or server hold status. The .com and .net domain name registration figures are as reported in Verisign’s most recent SEC filings.
4 The “What We Do” section is located on Verisign.com under the “About Verisign” tab and under the sub-tab “Overview.”
